EXPERIENCE

Quality Assurance

Sep 2021 - present

- Experienced Manual Tester with over 3+ years of dedicated and detail-oriented expertise in software quality assurance and testing.
- Experienced in collaborating with cross-functional teams to drive product excellence and meet deadlines.
- Proficient in black-box, white-box, and regression testing methodologies with strong analytical skills and a commitment to delivering high-quality software solutions.

PROJECTS

MEAN Stack Application

[Link](#)

- Developed a dynamic web application using the MEAN stack
- Implemented and configured with Mongoose.
- Developed RESTful APIs and server-side routing.
- Created a single-page application with routing, services, and components.

Netflix Clone

[Link](#)

- Designed and developed a Netflix-inspired video streaming web application using Angular.
- Developed a responsive interface for easy use on different devices and screen sizes.
- Integrated the Themoviedb API to fetch real-time movie and TV show data, including titles.
- Enhanced user engagement by implementing features like a watch list and search functionality.

Rest API-Blog Application

[Link](#)

- Implemented secure authentication and authorization mechanisms using JSON Web Tokens
- Developed endpoints for creating, editing, deleting, and retrieving user posts, including features
- Simplified food ordering process with customization options.
- Utilized MongoDB with Mongoose for data modeling, schema validation, and efficient querying, ensuring data integrity and performance.

AWARD

I received the Best QA Performance award for my outstanding testing abilities, proactive problem-solving, and teamwork that led to high-quality software.

TECHNICAL SKILLS
